Internship Report - PhillipCapital Platform (Phillip9)
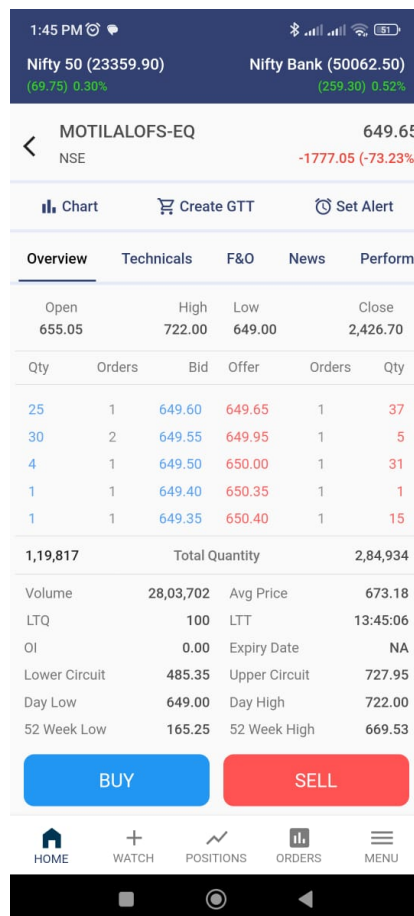

Introduction:
This document contains a detailed report of the bugs identified during the testing phase, as well as suggestions for enhancements that could further improve the functionality and user experience of the application.

Bugs:

1) Showing -73% for MOTILALOFS-EQ.NSE while true value should be +7.2, found this while seeing "TOP LOSERS" on app - 10 June 24'
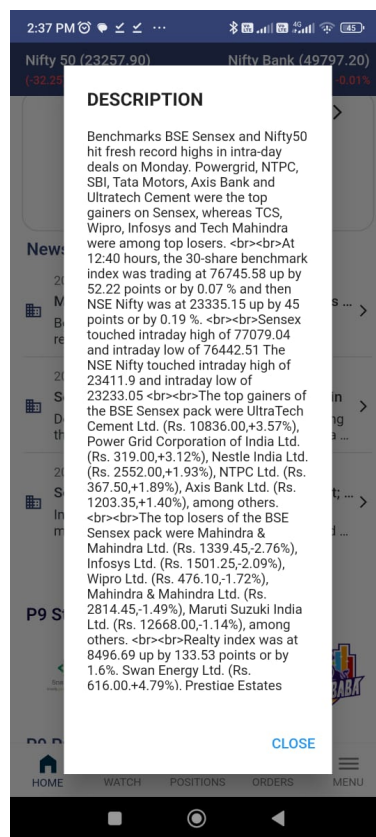

Screenshot:

2) While filling IPO if you select "Cutoff Price" and then reduce the "Price" it still keeps checkbox tick

3) On clicking News on "News" tab Description of the news contained html tags like
</br> Can be only seen in some news.

Screenshot:

Additional:

1) If we go to "Markets" tab on home page and select "View all" we cannot directly trade the instruments, but without going to "View all" we can. So we can implement trading the instrument in "View all" as well
